## DRAPER SWATHER DR-2000

[#GoodHarvests](#)

[www.piersanti.com.ar](http://www.piersanti.com.ar)

# DR-2000

25\* - 30 - 35 FEET

**TRIPLE FUNCTION**

**REGULAR HARVEST  
SIDE SWATHING  
CENTRAL SWATHING**

\*only central swathing is available.

## BENEFITS

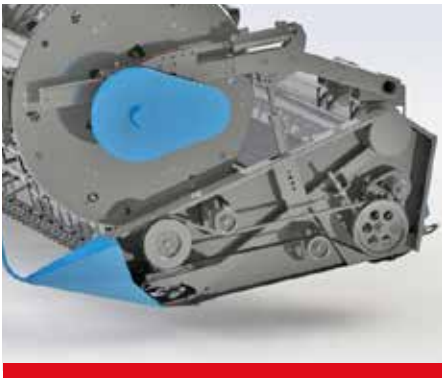

- More uniform feeding from the header to the harvester.
- Losses reduction on platform.
- Up to a 20% reduction of fuel consumption.
- Better crop treatment.
- High harvesting yield: produces more tones of threshed grains per hour than a conventional Header.
- Up to 3 more working hours per day.
- More durability of the harvester's internal parts due to less wear and tear.
- Low maintenance cost.
- Natural crop drying by swathing.
- Less agrochemical products usage due to natural drying.
- Adequate for organic production.

## DIMENSIONS

SIZE	CUTTING LENGTH	TOTAL LENGTH	TOTAL WIDTH	REEL DIAMETER	REEL TYPE	AROUND WEIGHT
25 FEET	7600 mm.	8020 mm.	2550 mm.	1080 mm.	Orbital	2540 Kg.
30 FEET	9070 mm.	9540 mm.	2550 mm.	1080 mm.	Orbital	2980 Kg.
35 FEET	10600 mm.	11140 mm.	2550 mm.	1080 mm.	Orbital	3210 Kg.

## OUTSTANDING FEATURES

- **Cutter Bar:** rigid.
- **Sickle drive:** Single V-belt from the left side.
- **Cutting system:** SCHUMACHER gear box, guards, and sickle bar.
- **Reel:** Orbital system powered by hydraulic motor. Hydraulic lifting and translation.

- **Draper control:** Mechanical, reversible.
- **Manual belt structure displacement.**

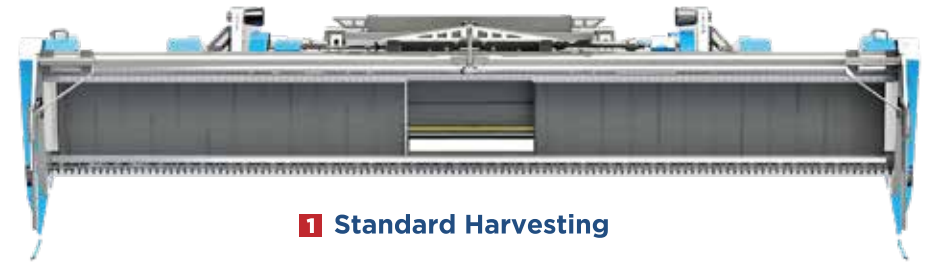

- **Main drive** with carbon fiber synchronous belts GATES POLYCHAIN® CARBON.

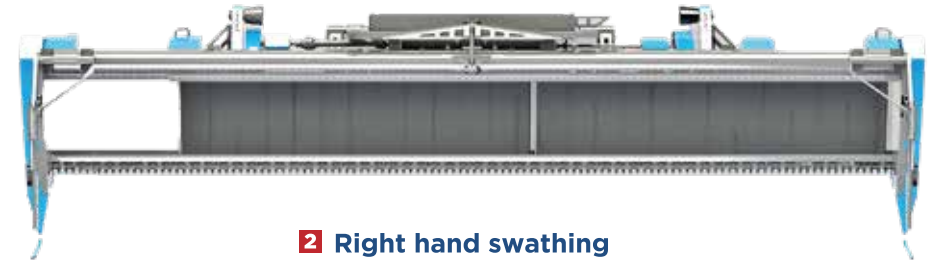

## OTHER FEATURES

- **Combine Adapter:** Interchangeable depending on combine model.
- **Sickle attack angle adjustment:** Mechanical by manual jack.
- **Height and leveling sensors:** By WIFI BOX system adjustable from cell phone application.
- **Cross augers:** optional hydraulic drive.
- **Side snout** prepared to adapt ZIEGLER canola cutting knife.
- **Gauge wheels** option for 35 feet.

## WORK CONFIGURATION

1 Standard Harvesting

2 Right hand swathing

3 Left hand swathing

4 Central swathing
